

TMF is the exclusive distributor of the I Series of the Wespath Institutional Investments (Wespath) funds to current and former Methodist and Wesleyan entities within the States of Texas and New Mexico.

August 2023 Investment Report

Highlights

- The S&P 500 Index of U.S. stocks declined 1.59%, while non-U.S. stocks, represented by the MSCI ACWI ex-U.S. IMI Index, declined 4.28% in August. The Bloomberg U.S. Aggregate Bond Index declined 0.66%.
- The Consumer Price Index (CPI) measure of inflation rose 3.2% over the last 12 months.
- The S&P Global U.S. Composite Purchasing Managers Index (PMI) declined to 50.4 in August, down from 52 in July.
- The U.S. economy added 187,000 jobs, and the unemployment rate rose from 3.5% in July to 3.8% in August.
- The Wespath U.S. Equity Fund-I Series, Wespath International Equity Fund-I Series, Wespath Fixed Income Fund-I Series, and Wespath Inflation Protection Fund-I Series underperformed their respective benchmarks.

Monthly Overview

Turbulence in Equity and Bond Markets

Equity markets experienced volatility in August due to a combination of global economic factors and geopolitical events. The S&P 500 and Nasdaq 100 both posted monthly declines, their first since February 2023.

Bond yields increased and prices decreased in August as investors evaluated the U.S. Treasury's plans to issue bonds to finance the federal budget deficit. Investors also expressed concerns about inflation, Federal Reserve (Fed) interest rate policy and the unexpected Fitch downgrade of the U.S. long-term credit rating from AAA to AA+. Fitch cited rising debt levels and ongoing deterioration in fiscal governance in its downgrade announcement.

The 30-year Treasury bond yield ended the month at 4.20%, a month-over-month increase of 0.18%, and the yield on the 2-year note ended the month at 4.85%. The Bloomberg U.S. Aggregate Bond Index decreased 0.6%, the Bloomberg U.S. High Yield Index rose 0.3% and the Bloomberg Commodity Index fell 0.8%.

U.S. Economic Expansion Continues

U.S. real GDP, as measured by the second estimate from the Bureau of Economic Analysis, grew at an annual rate of 2.1% in Q2 (below initial projections of 2.4%). Consumer spending increased 0.8% month-over-month in July, up from a revised 0.6% in June, with shoppers spending most on housing, vehicles, recreational goods, dining out and insurance. The CPI increased 3.2% year-over-year in July, exceeding the Fed's 2% inflation target. Core CPI inflation, which excludes food and energy, increased 4.7% over the last 12 months, the lowest level since October 2021.

The U.S. economy added 187,000 non-farm jobs in August, and the unemployment rate increased to 3.8% from 3.5% in July as the labor force participation rate rose by 0.2% to 62.8%.

Fed Remains Cautiously Hawkish on Rates

Central bankers, policymakers and economists gathered at the annual Jackson Hole Economic Symposium to discuss monetary policy. Fed Chair Jerome Powell emphasized that while inflation is down from its peak, the level remains too high and the Fed is prepared to raise interest rates further if appropriate.

Key Monthly Economic Statistics

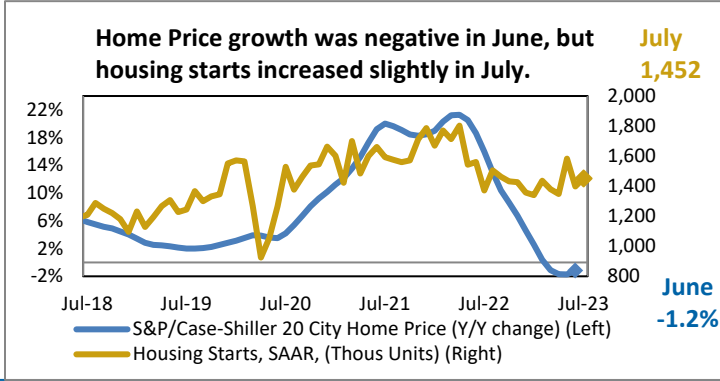

Chart of the Month

- Housing affordability in the U.S. fell to its lowest level in nearly four decades, driven by surging mortgage rates, rising home prices and rents, government policies, and housing inventory shortages.
- Over the past five years, the National Association of Realtors' housing affordability index, which measures the ability of the average household to afford a typical home (not spending more than 30% of area median income) fell to 88.
- When the index falls below 100, it indicates that a household with a median income does not have sufficient income to afford a median-priced home in the area.

Wespath Investment Fund Review (Net-of-Wespath Fees Performance)ⁱ

Equity Funds

Wespath U.S. Equity Fund – I Series

| Fund | August | YTD |
|-------------------------------------|--------|--------|
| Wespath U.S. Equity Fund – I Series | -2.98% | 16.60% |
| Russell 3000 Index | -1.93% | 18.01% |
| Difference (percentage points) | -1.05 | -1.41 |

- During the month, the fund underperformed its benchmark due to poor relative performance by active managers and the fund's strategic underweight to mega-tech growth companies and overweight to small- and mid-cap companies.
- Year to date, the fund's holdings in private markets and an underweight to strong performing mega-tech growth companies were key detractors from relative performance. To a lesser extent, the fund benefited from active managers' investments, particularly growth-oriented strategies, and excluding certain stocks in accordance with the Investment Exclusions policies (described [here](#)).

Wespath International Equity Fund – I Series

| Fund | August | YTD |
|---|--------|-------|
| Wespath International Equity Fund – I Series | -5.58% | 7.72% |
| MSCI ACWI ex U.S. Investable Market Index (Net) | -4.28% | 8.83% |
| Difference (percentage points) | -1.30 | -1.11 |

- During the month and year to date periods, the fund underperformed its benchmark. Active managers' underperformance was mainly in the emerging markets and investing in companies that are best positioned to benefit from the transition to a low-carbon economy and resource-constrained environment.

Fixed Income Funds

Wespath Fixed Income Fund – I Series

| Fund | August | YTD |
|---|--------|-------|
| Wespath Fixed Income Fund – I Series | -0.57% | 3.21% |
| Bloomberg U.S. Universal (ex MBS) Index | -0.54% | 2.07% |
| Difference (percentage points) | -0.03 | +1.14 |

- For August, the fund modestly underperformed the benchmark. The allocations to Wespath's Positive Social Purpose Lending Program and high yield corporate bonds positively contributed to benchmark-relative performance, while emerging market debt detracted.
- The fund's overweight allocations to below investment grade credit and emerging market debt largely drove positive benchmark-relative performance year to date.

Wespath Inflation Protection Fund – I Series

| Fund | August | YTD |
|--|--------|-------|
| Wespath Inflation Protection Fund – I Series (IPF-I) | -1.00% | 2.70% |
| IPF-I Benchmark ⁱⁱ | -0.88% | 1.29% |
| Difference (percentage points) | -0.12 | +1.41 |

- During August, the fund's allocations to floating rate senior secured loans and developed market global inflation linked bonds helped relative performance, but the contributions were more than offset by the allocation to emerging market inflation linked bonds.
- Year to date, the fund's allocations to floating rates senior secured loans, emerging and developed market global inflation linked bonds, and issue selection within emerging markets helped benchmark relative performance.
