

WEEKLY *Impact* NOTE RATES

Invest in the Mission of the Church While Earning Competitive Returns

TMF Impact Notes offer investors 1–5-year fixed rate of returns comparable to bank CD and money market investments.

TMF investors earn competitive returns and fund ministries that serve the needs of local churches and their communities.

TMF investors make possible loans, grants, and leadership ministries that grow churches and their positive impact in the communities they serve.

Through TMF, purpose-driven investors provide financial resources across Texas and New Mexico supporting congregations and clergy.

IMPACT STORY

Continuing the Cycle of Generosity

Immigrating from Cuba with the dream of building a prosperous life in the United States is Ruben and Alina Esquivel’s journey of being blessed by the generosity of others in a time of need.

Today, they are investing in the journeys of others by improving communities through investing in TMF Impact Notes that fund loans to churches and nonprofits.

The Esquivel’s investments have provided critically needed health care to uninsured and underinsured persons in its community through Open Arms Health Clinic in Arlington, Texas. Their investments also helped make the Mansfield Mission Center’s thrift store possible, providing much-needed clothing and home furnishings for the local community.

These stories are just a few among countless others demonstrating the potential of impact investing to change organizations and transform communities.
